FOR IMMEDIATE RELEASE

Pavement Improvement Project on Whittier Boulevard (SR-72)

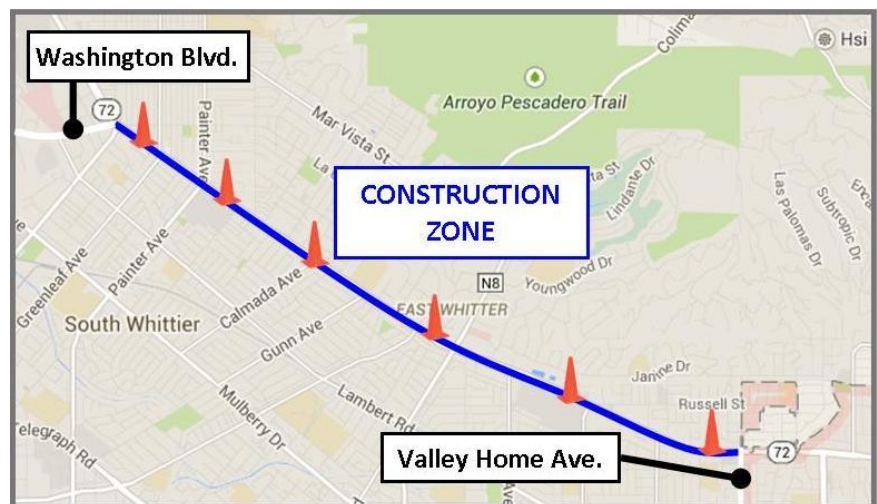

Whittier - The California Department of Transportation (Caltrans) will begin a paving improvements project in both east- and westbound directions on Whittier Boulevard (SR-72) between Valley Home Avenue and Washington Boulevard starting Monday, November 17, 2014 and continuing through early February 2015.

Construction activities will take place nightly Monday through Friday from 7 p.m. to 6 a.m., excluding weekends and holidays. One to two lanes in one direction may be closed intermittently. Accessibility for motorists will be maintained at all times.

The scope of the work includes grinding existing pavement, repaving, installing traffic loops, and restriping all lanes with thermoplastic paint. The new surface will extend the life of the pavement, thereby minimizing future maintenance-related closures and provide a smoother drive for motorists.

Local businesses, motorists and residents may experience traffic delays, noise and minimal vibration from construction activities. Caltrans appreciates your cooperation while we work to improve Whittier Boulevard.

The contractor for this \$1.4 million project is All American Asphalt of Corona, California. For additional information, contact Jackie Beaver at (213) 897-7602 or Jacqueline.beaver@dot.ca.gov.
